

LAS-SERIES

LAS-SERIES

Designed with new technique, the frame is prevented from asymmetric press arms.

Guide rail: It's made of alloy steel with high temperature treatment after grinding. It has good wear-ability, corrosion-resistance and ductility.

Self-service seat adjust system: The seat can be easily adjusted to any of the eight positions (A height difference of 3cm is between two positions which are next to each other.) by lifting it up or down with spring inside the adjustment system.

Weight horn: Some of the models are equipped with quality-assured weight horns made of stainless steel tubes where barbell plates of more specifications can be put for more convenient usage.
